

Technical Data Sheet

Pelmatan A

Sulphochlorinated paraffin oil

Product Review

PELMATAN A is pure sulfochlorinated paraffin oil.

Product Characteristics

| | |
|--------------------|-------------------------------|
| Physical state | Light yellow-colorless liquid |
| pH (solute. 1:10) | 2,0 |
| Active Substance | 100 %. |

Benefits & Application

PELMATAN A is insoluble with water.

PELMATAN A emulsifies natural fats and avoids the formation of fatty spews.

PELMATAN A used as lubricant for the fibers in chrome tanning thus improves tear resistance.

PELMATAN A is the main tanning component for chamois leather production.

The main application is in chrome tanning to improve tear resistance. The percentage is between 0,5 – 2,0%. To guarantee spew problem 1,0 % addition to the fatliquoring process is recommended.

Handling & Storage

12 month if stored between 5° - 35°C.
