

Technical Data Sheet

Pelmatol LOP

Tanning Auxiliary

Product Review

PELMATOL LOP is a synthetic amide.

Product Characteristics

Physical state	Beige dull liquid paste
pH (solute. 1:10)	8,0 – 10,0
Active Substance	19,0 – 21,0 %
Light Fastness	Good
Charge	Not ionic

Benefits & Application

PELMATOL LOP is particularly used to distributing the chrome in uniform way into the leathers.

It can be used after sammying in the wetting back when the leather is too dry; we add 2-3% of PELMATOL LOP and left react for 2 hours.

After this treatment the leather will be in the right conditions to be retanned without sammying again.

Leathers treated with PELMATOL LOP shown the surface well opened without have empty bally.

Is helping also to improve the brightness of dyeing and the exhaustions of the chemicals used during the retannig process.

Handling & Storage

12 months if stored between 5° - 35°C.
