

Technical Data Sheet

Pelmolin PLY

Softening polymer

Product Review

PELMOLIN PLY is a polymer with softening effect.

Product Characteristics

Physical state	White paste
pH (solute. 1:10)	6,5 approx.
Active Substance	25%
Light Fastness	Very good

Benefits & Application

PELMOLIN PLY is an acrylic polymer with softening action suitable for production of soft washable article, like garment or upholstery, maintaining the original softness after washing.

PELMOLIN PLY on waterproof fatliquoring, helps the penetration of the waterproofing fatliquor through the leather section.

PELMOLIN PLY is used in combination together with traditional fatliquor for soft articles like garment or upholstery. For waterproof, article is used together with our PELMATOL WRP and PELMATOL WPRF.

Handling & Storage

12 months if stored between 5° - 35°C
