

Technical Data Sheet

Pelmolin SB

Stabilizer for fatliquors

Product Review

PELMOLIN SB is an anionic mixture of sulphated fatty alcohols.

Product Characteristics

Physical state	Clear to yellowish liquid
pH (solute. 1:10)	6,5 approx.

Benefits & Application

PELMOLIN SB is applied alone or in combination with PELMATOL AMF during pickle or mineral tanning. PELMOLIN SB promotes a better distribution of the fatliquor and so improved softness is achieved. PELMOLIN SB increases physical properties, e. g. the tear or tensile-strength by penetrating fatliquors into the cross-section.

Handling & Storage

12 months if stored between 5° - 35°C
