

Technical Data Sheet

Wax 6022

Product Review

WAX 6022 is an emulsion of waxes in water.

Product Characteristics

Physical state	White dull liquid
pH (solute. 1:10)	8,5 – 10,5
Active Substance	9,0 - 11,0 %
Light Fastness	Good
Charge	Anionic

Benefits & Application

WAX 6022 is used as antisticking agent mixed with polymer binders in finishings of splits, fullgrain and buffed skins. It eliminated sticking and thermoplastic effect, giving film a pleasantly silky hand. It can also be used in final coats together with silicones and feel modifiers.

Handling & Storage

12 months if stored between 5° - 35°C.

Our recommendations are based on according to our experiences and observations. The customer should perform his own tests in order to determine the suitability of the products for their production routine. As İLİKEM KİMYA can not control the conditions of usage of the products in tannery, the consequences comes within the customers responsibility.
